Preface

Dear Forum Participants,

On behalf of Department of Management and Law, Economics and Social Sciences Faculty at Poznań University of Life Sciences I have the honor to welcome you to **International Forum on Agri-Food Logistics**

International Forum follows the National Conference "AGROLOGISTYKA 2012", which was held in Poznań, Poland. The conference was dedicated to practical and theoretical issues of logistics in the food industry. It was the first conference on this subject in our country. The modern food chains are considered as global ones, thus we have decided to organise an international Forum.

There are a lot of new phenomena all over the world. They consider problems and challenges for both - science and business. They cover such issues as:

- Safety and transparency in the food supply chain
- The role of logistics in the development of biofuel production
- The reverse logistics of by-products in the production of raw materials
- The role of cooperatives in building supply chains
- Technological and technical advances in logistics
- The risk in the food supply chain
- The role of logistics in sustainable development.

Many research centres undertake studies on these problems. Thus, the objective of Forum is to initiate discussion, exchange views and present the results of conducted researches among them and global business

Nowadays the customer service is one the most important issues. In the food supply chains not only time of delivery is important but also the supply of products which are both healthy and safe.

Therefore as the theme of Forum we have suggested "*Efficient Logistics as a Chance of Efficient Consumer Response in the Agri-Food Sector.*"

This book includes the extended abstracts of presented papers at the Forum or published afterwards in two scientific journals - Journal of Agribusiness and Rural Development and Logistyka.

I hope that the Forum will make a platform for integration of the scientific community and businesses dealing with the issues of agri-food logistics all over the world.

I wish all participants an enjoyable, productive and rewarding Forum and a pleasant stay in Poznan

Karol Wajszczuk, PhD

Chair of Organising Committee

International Forum on Agri - Food Logistics

and the 2nd National Scientific Conference AGROLOGISTYKA 2014

Poznan, September 2014
