

Webinar of the Polish Phytopathological Society

16 April 2025

Dr. Mariola B Kopcinski,

Intrinsyx Bio, USA *Head of Commercialization and Business Development*

holds Ph.D. and M.S. in plant pathology and biochemistry from Agricultural University, Poznan Poland, post-doctoral experience from Cornell University in seed technology and biocontrol, and MBA in finance from the University of Rochester. She held several business and research management roles at major Agricultural Chemical companies including DuPont, Syngenta Europe, and FMC, as well as start-ups in the areas of chemicals, biostimulants and biopesticides. She had been instrumental in creation of Crop Enhancement project at Syngenta to promote plant health and to combine chemical and biological control in the programs approach. Currently she is working as the Head of Commercialization and Business Development at IntrinsyxBio, wholly owned subsidiary of Syngenta, developing naturally occurring bacterial endophytes for enhanced crop's nutrients uptake and strengthened abiotic stressors resistance.
